

Lutes reviewed the agreement between the City and Gene Blythe and discussed the points that had been changed. Mayor Daggett then signed the agreement. *A copy is included in the minutes.*

Frier discussed the work that had been done at Well #3 and that a 10 h.p. pump had been installed instead of the 5 h.p. that was in the well. This will pump 135 gallons per minute.

Frier is to notify Gary Moler Sanitation to leave a dumpster at the City shop. The cost will be \$216.00

Mayor Daggett asked Frier if he would see if the weeds in the park area of the Blythe Addition could be mowed with the rotary mower on the tractor.

Well house specifications were reviewed. It was decided to use 5/8 *plywood* on the interior and also to install a power vent.

The burning of garbage was again discussed. It was suggested that possibly mandatory garbage pickup would solve the problem.

Motion to adjourn by Gearhart, second by Graham. Motion carried. 7:00 P.M.

SPECIAL MEETING  
JULY 28, 1982

The meeting was called to order at 12 noon by Mayor Dilman Daggett in the council chambers.

Council members present: Bob Zern, Dorothy King, Bob Lutes, Bill Gearhart and Vane Graham.

Also present: Bill Grabe and Les Wolfe

Les Wolfe very briefly reviewed the water system report. Zern questioned the need for a new tower if several more wells were spaced around Conrad. Wolfe stated that the maximum gallonage couldn't be pumped very long in case of a fire. Mayor Daggett stated that because of age, Conrad's tower would need to be replaced before too many years anyway.

Wolfe stated that he felt something was needed in west Conrad in the future. Either the water main down the alley between Main and Washington or a main down Lillian west from Main.

There was a motion by Gearhart that the water mains not be installed under the streets at the alley crossings on Maple, Lillian and Grant Streets between Main and Washington. Second by Graham. Motion carried.

Graham made the motion to extend the 6 inch water main from Main to the alley west of Washington on Lillian Street. Second by Lutes. Motion carried.

There was some discussion with Bill Grabe about taking out the intake on the southwest corner of Lillian. The council was in favor of leaving the intake in.

Lutes stated it was his understanding from reading the Engineer's Agreement, that there would be an engineer on the project at all times. Wolfe and Grabe stated that there would be an inspector here at all times. This will be discussed with Dwayne Garber.

Gearhart was appointed to talk to a park board member about the hours at the swimming pool. He felt the pool was closed unnecessarily too often.

Motion to adjourn by Gearhart. Second by Graham. 1:15 P.M.
